

Dear Hiring Team,

I am excited to apply for the Technical Lead – Python & AI role at Nearform.

I have over 16 years of experience building scalable backend systems and leading engineering teams. My main expertise is Python, distributed microservices, AWS, Kafka, and cloud-based applications. More recently, I have been working on AI and LLM-based solutions, including model evaluation, validation pipelines, and AI workflows.

I enjoy working closely with clients, understanding business requirements, and helping teams deliver reliable, high-quality software. I also have experience mentoring engineers, driving technical decisions, and building systems that are scalable and easy to maintain.

Nearform's focus on technical excellence, collaboration, and solving real business problems is what attracted me to this opportunity. I would welcome the chance to contribute my technical and leadership experience while continuing to learn and grow with your team.

Thank you for considering my application. I look forward to the opportunity to speak with you.

Kind regards,

Nisha Gadhe
