

Nisha Gadhe

Senior Backend Engineer | Python | Distributed Systems | AWS | AI-Powered Platforms

Glasgow, United Kingdom

Eligible to work in the UK (Family Route Visa)

Availability: Available to start immediately

Email: nisha.sonawane@gmail.com **Mobile:** +44 7721018902

LinkedIn: <https://www.linkedin.com/in/nisha-g-profile> | **GitHub:** <https://github.com/niphoenixo>

Professional Summary

Senior Python Backend Engineer with **16+ years of experience** designing, building, and operating high-performance backend systems across **HRTech, e-commerce, travel, and AI-driven platforms**.

Strong expertise in **distributed systems, microservices architecture, event-driven platforms, and cloud-native development on AWS**. Proven track record of building resilient backend services, improving system scalability, and maintaining production stability in high-traffic SaaS environments.

Recently focused on **AI automation platforms**, including **LLM evaluation workflows, supervised fine-tuning support, validation pipelines, and intelligent document processing using OCR and large language models**.

Core Technical Skills

Languages: Python, PHP

Frameworks: FastAPI, Flask

Frontend: reactJS

Architecture: Distributed Systems, Microservices, Event-Driven Systems

Data & Messaging: Kafka, Redis, MySQL, PostgreSQL, MongoDB

APIs: REST APIs, GraphQL

Search & Analytics: Elasticsearch

Cloud & DevOps: AWS (ECS, Lambda, S3, Route53), Docker, CI/CD

AI Systems: LLM Evaluation, Intelligent Document Processing, OCR Pipelines, SFT Workflows

Engineering Practices: Incident Management, RCA, Performance Optimisation, Observability

Professional Experience

Engineering Manager — Simplify VMS | Jan 2023 – June 2026

Principal Software Engineer — Simplify VMS | Oct 2021 - Dec 2022

Lead backend architecture and platform scalability for a high-traffic **HRTech SaaS platform** supporting workforce management and document processing workflows.

- Designed and implemented **event-driven microservices** using Python, Kafka, Redis, MySQL, and MongoDB to support high-volume transactional systems.
 - Designed Python-based document processing pipelines using **OCR** and **LLM-powered** analysis to automate high-volume HR document workflows.
 - Built **asynchronous backend** processing pipelines with retry mechanisms, partial failure recovery, and observability for long-running workloads.
 - Led backend engineering team while remaining hands-on in **architecture design, production debugging, and system optimisation**.
 - Improved platform reliability through **incident ownership, root cause analysis (RCA), and performance tuning**.
-

LLM Evaluation Engineer (Contract) — Turing (NVIDIA Client) | Nov 2025 – Jan 2026

- Designed **adversarial SFT datasets** to evaluate QWEN and NeMo large language models, achieving **50%+ validator failure rates** exposing weaknesses in safety behaviour, formatting compliance, and instruction adherence.
 - Developed **rule-based validation judges** to systematically analyse model responses and document failure patterns to support model improvement efforts.
-

Tech Lead — ValueLabs | Apr 2021 – Oct 2021

- Led backend development for enterprise SaaS platforms using **Python microservices and REST APIs**.
- Implemented **CI/CD pipelines with automated testing and quality gates** improving reliability and deployment stability.
- Contributed to architecture improvements enhancing **service modularity, scalability, and maintainability**.

Independent Backend Consultant — Remote | Sep 2020 – Apr 2021

- Designed and developed Python backend services and REST APIs for international SaaS clients.
 - Built scalable backend systems and automation workflows integrating AWS services and third-party APIs.
-

Senior SDE(FullStack) — Gray Routes Technology | Apr 2019 – Sep 2020

- Developed **REST and GraphQL APIs** for high-traffic enterprise platforms.
 - Built microservices using **Python, ReactJS, Node.js** and contributed to AI-powered forecasting solutions using TensorFlow and pandas.
-

Senior Software Engineer(FullStack)— Qtech Software Pvt. Ltd. | Dec 2009 – Nov 2017

- Led backend development for **travel-tech platforms** using Python, Redis, and MongoDB.
 - Designed scalable APIs and integrated multiple third-party travel service providers.
-

Software Engineer — Purpletech Software Pvt. Ltd. | Mar 2007 – Dec 2009

- Developed backend systems using **PHP and MySQL**.
 - Delivered government projects for **Mantralaya and Maharashtra Pollution Control Board (MPCB)**.
-

Education

M.Sc. Computer Science

Pune University

B.C.S – Computer Science

Pune University
